

# Tales Toolkit

## What is it:

Here at The Beacon CE Primary, we use Tales Toolkit in our Early Years Foundation. Tales Toolkit is an award-winning programme that adds rocket fuel to language, communication and literacy development by using child-led storytelling. Not only that it has a proven record of impacting a whole range of important skills, including creativity, confidence and problem-solving. Children can make up their own stories using; characters, settings, problems and solutions.

## Impact:

We use Tales Toolkit because we have seen the continued positive impact it has had on the children's progress and our staff really believe in it. It really supports children's communication and language skills, exposes them to a range of different stories with advanced language in them, supports sustained shared thinking, quality interactions, developing a love of stories and supports creating a language rich environment.
