

# URLEY: ECERS

## What is it:

*We aim to provide meaningful contexts for communication and language in EYFS, following the URLEY Approach that supports and develops children's oral language and communication skills and encourage them to be resilient and independent learners. We use the Early Childhood Environment Rating Scale (ECERS-3) to develop enabling environments in our indoor and outdoor provision with high quality communication & language interactions, encouraging sustained shared thinking.*

## Impact:

*Using the ECERS Rating Scale, we have a set scale to for all staff to work alongside to assess the quality of our learning environments to ensure they are the best they can possibly be and promote all children's communication and language skills. The scales are used to highlight areas of high quality and areas that we need to make improvements on.*
